

## uWin<sup>08</sup> Programming Editor Now with Built-in Photo Editor at no extra cost!!

The uWin<sup>08</sup> programming editor has raised the bar further in HMI software by including an exclusive, advanced, patent pending, bitmap photo editor that allows any bitmap being imported (such as from the 4000 symbols library) to be edited almost like “Photoshop” within the uWin<sup>08</sup> Software itself.

It eliminates the need to :

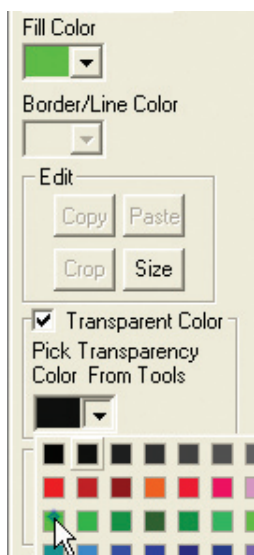

1. Have “Photoshop” or “MSPaint” program installed on your computer
2. Bring the bitmap into “Photoshop”, edit it and then import it back to the HMI program

Built-In Shapes, Drawing Pencils, Spray Cans, Eraser and more ...

Fill Color  
Fill the color on the bitmap of your own choice from the color palette.

Transparent color  
The transparent color is used to make all areas of that color which is as same as the fill color to be invisible or transparent.  
In the above example the green fill and transparent color makes it invisible or transparent.

Zoom Tool  
Zoom tool has 1 to 4 level , making edits in tight spots is no longer a problem. For pixel-per-pixel level detail there is a zoom level 4

Final bitmap Image  
With the above built-in photo editing feature in uWin<sup>08</sup> software eliminates a need of photoshop on your PC
